Good question.

We will collect the sample as we would have done anyway, and sign the samples over to LBG via chain of custody.

Hi Kristen - Please let us know how you envision split sample collection to occur if LBG staff will be observing from a separate vessel in the distance.

Subject: EPA Oversight CHANGE

As we go through the first day on the water, Don Kretchmer and I have been talking and AECOM has decided that we do, in fact, need all 4 AECOM staff on the West Cove during sampling.

Since the West Cove has a maximum legal capacity of 8 people, we do not have room for EPA or Tierra oversight.

AECOM welcomes EPA oversight, and please feel free to organize a vessel to watch from a distance (you can coordinate directly with the OSI captain and Don Kretchmer (AECOM team leader on the West Cove) regarding distance and direction). Again, we cannot allow rafting in Newark Bay due to safety concerns.

We welcome anyone to watch the equipment blanks being collected tomorrow at the CPG dock at 08:00 or on Thursday evening (time TBD) at the Liberty Landing Marina/Yacht Club.

Please note that the West Cove will be mobilizing out of Liberty Landing Yacht Club all week, not RRYC (where Willing II will be).
